2025 - 2026 SNAPSHOT

The Institute of Clean Air Companies plays an important role in keeping government and industry stakeholders up-to-date on the latest emissions control, measurement and monitoring technologies. Our members' technologies successfully manage emissions generated by data centers, power generation, oil and gas, industrial, maritime sectors and more. This includes PFAS, formaldehyde, mercury, PM, criteria pollutants and many others.

Here is an overview of some of the key engagement activities ICAC did over the past year, from public webinars to meeting with government decision makers.

PUBLIC WEBINARS

- Data Centers: Avoiding Air Permitting Pitfalls (November 2025)
- Data Centers: Critical Control Technology (February 2026)
- Data Centers: Reliable Measurement and Monitoring Technology (March 2026)

INITIATIVES

- Technology ID
 - Industrial Boilers (November '25)
 - Local Air Toxics (January '25)
 - Carbon Removal Monitoring (January '26)
 - PFAS Monitoring & Technologies (April '26)
- Emerging Leadership Program for Young Professionals

STAKEHOLDER MEETINGS

- Internal PFAS Workgroup meeting
- Internal Hydrogen Workgroup meeting
- State Regulatory agencies
- U.S. Department of State
- California Air Resources Board (CARB)
- CalEPA
- Capitol Hill offices
- Cross-Industry Events with other organizations
- U.S. Environmental Protection Agency
